

EMPLOYEE APPRECIATION DAYS

As part of the Community Education Program, Back In Action Chiropractic Center – in partnership with local businesses – is proud to offer this complimentary service.

Employees are treated to a 5-10 minute chair massage and a spinal screening which is a painless, computerized scan. High levels of muscle tension which can lead to stress and injury are associated with spinal misalignment. The scan measures the electronic impulses in the back and is often used as an assessment to help to detect spinal imbalances, and keep employees injury free.

The Employee Appreciation Day is a popular and welcome educational opportunity for employees to learn and to reduce stress.

My staff thought this was just a treat! Dr. Hansen and his staff were professional, and pleasant, and the massages were appreciated and enjoyed by our entire staff. Thank you so much! We can't wait to bring you back!

- Jane McCaffrey, Human Resources Manager, Sony Distribution Center

We utilize this service twice a year as an incentive as well as a thank you to our entire plant staff. They always love it, and it does wonders for morale.

-Amy Cottrell, HR Supervisor, Marmon Keystone
